## About us:-

**UNIFIELD AGRO INDUSTRIES** is a trusted name in the agro-food industry, committed to delivering quality, trust, and innovation through every product it offers. The company's vision is to provide high-quality food products that bring health, taste, and convenience to households worldwide.

Core Business and Product Range:

The company deals in a wide range of food products and agro commodities, serving customers across India and international markets. Their diverse product portfolio includes:

**Rice:** Varieties like Basmati (1121, 1509, Pusa, etc.), Non-Basmati (IR64, Sona Masoori), Parboiled, Brown, and Organic Rice.

**Pulses:** Common examples include Toor Dal, Moong Dal, Chana Dal, Masoor Dal, Urad Dal, Kidney Beans, and Chickpeas.

**Millets:** A group of small-seeded ancient grains known for being naturally gluten-free and rich in dietary fiber and protein. Their range includes Foxtail Millet, Pearl Millet (Bajra), Finger Millet (Ragi), and others.

**Spices:** Both whole and powdered spices, such as Turmeric, Red Chili, Coriander, Cumin, Black Pepper, and Cardamom.

**Oil:** Edible oils like Mustard Oil (Kachi Ghani), Sunflower Oil, Groundnut Oil, and Coconut Oil.

**Confectionery & Beverages:** Products like White Sugar, Organic Cane Sugar, Jaggery, and various types of Tea (Black, Green, Herbal, and Instant Premixes). **Snacks & Others:** This includes Soya Chunks/Granules, Makhana (Fox Nuts), Pasta (Penne, Shell, Macaroni, Spaghetti, Vermicelli), Salt, and Maize.

## COMMITMENT TO EXCELLENCE:

UNIFIELD AGRO INDUSTRIES maintains the highest standards of quality, hygiene, and sustainability.

**Quality First:** Every product undergoes strict quality checks to ensure freshness and purity.

**Export Strengths:** They have global supply capability with reliable logistics and adhere to international quality and food safety standards.

**Sustainability:** The company is committed to ethical sourcing and eco-friendly practices.

The company's sustained growth is driven by its loyal global customer base. **Contact Information:**

# RICE

Explore the world of rice with our agro commodities where quality meets tradition. From fragrant Basmati to versatile Jasmine, discover a diverse range of rice varieties meticulously processed and packaged to perfection, ensuring excellence in every grain.

- **Basmati Rice (1121, 1509, 1401, Traditional, Pusa, Sharbati)**
- **Non-Basmati Rice (IR64, Sona Masoori, Ponni, Matta, Broken Rice, PR11/14)**
- **Parboiled Rice**
- **Brown Rice**
- **Organic Rice**

# PULSES

Pulses are the edible seeds of leguminous plants that are harvested dry. They belong to the legume family (Fabaceae) but exclude crops harvested green (like green peas and green beans). Common examples of pulses include chickpeas, lentils, dry peas, kidney beans, black gram, pigeon peas, and mung beans.

- **Toor Dal (Arhar Dal)**
- **Moong Dal (Yellow, Green, Whole, Split)**
- **Chana Dal**
- **Masoor Dal (Red Lentils)**
- **Urad Dal (Whole, Split, White, Black)**
- **Kidney Beans (Rajma – Chitra, Red, Kashmiri)**
- **Black Chickpeas (Kala Chana)**
- **White Chickpeas (Kabuli Chana)**
- **Horse Gram**

**Packaging can be customised as per requirement**

# SUGAR

Sugar is a sweet, crystalline carbohydrate primarily obtained from sugarcane and sugar beet. It is widely used as a natural sweetener in foods and beverages. Chemically, the most common form is sucrose, a disaccharide composed of glucose and fructose.

- **White Crystal Sugar**
- **Refined Sugar**
- **Brown Sugar**
- **Jaggery (Powder, Cubes, Liquid)**
- **Organic Cane Sugar**

# TEA

Tea is one of the most widely consumed beverages in the world, cherished for its refreshing taste, soothing aroma, and numerous health benefits. It is made from the dried leaves of the *Camellia sinensis* plant, available in different varieties such as black, green, white, oolong, and herbal blends. Each type of tea carries a distinct flavor profile—ranging from bold and robust to delicate and flora

- **Black Tea (CTC, Orthodox)**
- **Green Tea**
- **Herbal Tea (Tulsi, Lemongrass, Mint, Chamomile)**
- **White Tea**
- **Instant Tea Premixes (Masala, Ginger, Cardamom, Lemon)**

Packaging can be customised as per requirement

# OIL

Oil is an essential commodity widely used in cooking, food preparation, health, and industry. Derived from plant seeds, fruits, or animal sources, edible oils such as mustard oil, sunflower oil, groundnut oil, olive oil, and soybean oil are staple ingredients in kitchens worldwide. They enhance flavor, provide energy, and supply essential fatty acids and vitamins like A, D, E, and K.

- Sunflower Oil • Soybean Oil • Mustard Oil
- Groundnut Oil • Rice Bran Oil • Palm Oil
- Coconut Oil • Sesame Oil • Olive Oil

# SPICES

Spices are natural flavoring agents obtained from seeds, roots, bark, fruits, and other plant parts. They are used to enhance the taste, aroma, and color of food, while also offering several health benefits. India is known as the “Land of Spices,” producing a wide variety such as turmeric, cumin, cardamom, black pepper, cinnamon, cloves, and coriander.

- Turmeric (Powder, Whole)
- Red Chili (Whole, Powder, Flakes)
- Coriander (Seeds, Powder)
- Cumin (Seeds, Powder)
- Black Pepper (Whole, Powder)
- Cardamom (Green, Black)
- Cloves
- Cinnamon
- Fenugreek (Seeds, Powder)

Packaging can be customised as per requirement

# SOYA CHUNKS

Soya chunks, also known as soy nuggets or meal maker, are protein-rich food products made from defatted soy flour after the oil has been extracted. They are widely regarded as a healthy vegetarian substitute for meat due to their high protein content, chewy texture, and versatility in cooking.

- Regular Soya Chunks
- Mini Soya Chunks
- Soya Granules
- Soya Flour

# MILLETS

Millets are a group of small-seeded ancient grains, widely regarded as a powerhouse of nutrition. Naturally gluten-free, they are rich in dietary fiber, plant-based protein, essential minerals (iron, calcium, magnesium, phosphorus), and B-vitamins. Known for their low glycemic index, millets help in managing blood sugar levels, improving digestion, and supporting heart health.

- Pearl Millet (Bajra)
- Finger Millet (Ragi)
- Foxtail Millet
- Little Millet
- Barnyard Millet
- Proso Millet
- Kodo Millet

Packaging can be customised as per requirement

# SALT

Salt is one of the most essential and widely used minerals in the world. Primarily composed of sodium chloride (NaCl), it is obtained from seawater or mined from rock salt deposits. Apart from being a natural flavor enhancer in cooking, salt plays a vital role in food preservation, maintaining body fluid balance, and supporting nerve and muscle functions.

- Refined Iodized Salt
- Rock Salt (Sendha Namak)
- Black Salt (Kala Namak)
- Sea Salt
- Himalayan Pink Salt

# CHICKPEA

Chickpea, also known as chana or garbanzo bean, is a highly nutritious legume widely consumed across the world. It comes in two main varieties – desi (small, dark brown seeds with a rough coat, commonly grown in India) and kabuli (larger, light-colored seeds with a smooth coat).

- Kabuli Chickpeas (Large, Medium, Small)
- Desi Chickpeas (Brown Chana)
- Roasted Chickpeas (Salted, Spiced, Plain)

Packaging can be customised as per requirement

[www.unigroups.com](http://www.unigroups.com)

# MAIZE

Maize, also known as corn, is one of the most widely grown cereal grains in the world. It is a staple food in many countries and serves as a major source of carbohydrates, energy, and essential nutrients. The kernels come in different colors—yellow, white, red, or multicolored—depending on the variety.

- **Yellow Maize (Corn)**
- **White Maize**
- **Popcorn Maize**
- **Corn Grits**
- **Corn Flour**
- **Sweet Corn**

# MAKHANA

Makhana, also known as fox nuts or lotus seeds, are the edible seeds of the lotus plant (*Euryale ferox*). Widely consumed across India and other Asian countries, they are prized for their light, crunchy texture and numerous health benefits. Naturally gluten-free and low in calories, makhana is considered a wholesome snack, often roasted and lightly seasoned for flavor.

- **Peri Peri Makhana**
- **Pudina Makhana**
- **Masala Makhana**
- **Cheese Makhana**
- **Cream & Onion Makhana**
- **Caramel Makhana**

Packaging can be customised as per requirement

[www.unigroups.com](http://www.unigroups.com)

# VERMICELLI

Vermicelli is a type of thin pasta, resembling slender threads or small noodles. It is made from refined wheat flour, semolina, or rice, depending on the regional variety. Widely used in Indian, Middle Eastern, and Asian cuisines, vermicelli is known for its versatility.

- Made from wheat, semolina, or rice.
- Fine, long strands, resembling thin noodles.
- Easy to cook and digest.
- Can be roasted, boiled, or fried depending on the recipe.

# PENNE PASTA

Penne Pasta is a type of Italian pasta known for its cylindrical shape with angled edges, resembling the tip of a quill pen. Its hollow center and ridged or smooth surface make it ideal for holding sauces, whether creamy, cheesy, or tomato-based. Penne is one of the most versatile pasta types, commonly used in baked dishes, pasta salads, or paired with vegetables, meats, and seafood.

- Penne Lisce – smooth surface
- Penne Rigate – ridged surface, better for holding sauces

Packaging can be customised as per requirement

[www.unigroups.com](http://www.unigroups.com)

# SHELL PASTA

Shell pasta, also known as Conchiglie, is a type of Italian pasta shaped like a seashell. Its ridged, hollow design makes it excellent for holding sauces, cheese, and fillings. Shell pasta comes in various sizes: small ones are often used in soups and salads, while medium and large shells are ideal for baked dishes or stuffing with ingredients like cheese, vegetables, or meats.

- Shaped like seashells, available in small, medium, and large sizes.
- The ridges and curves trap sauces well, making it ideal for creamy or chunky dishes.
- Larger shells (conchiglioni) are often stuffed with cheese, vegetables, or meat and baked.

# CAVATAPPI PASTA

Cavatappi pasta is a short, spiral-shaped pasta variety known for its distinctive corkscrew or twisted tube appearance. Its name “cavatappi” means “corkscrews” in Italian, reflecting its spiral form. This hollow, ridged pasta is excellent at holding onto sauces, making it a versatile choice in many dishes.

- Short, spiral tube pasta
- Hollow center with ridges
- Excellent for creamy, cheesy, or baked dishes
- Holds sauce well due to twists and grooves

Packaging can be customised as per requirement

[www.unigroups.com](http://www.unigroups.com)

# MACARONI PASTA

Macaroni Pasta is a type of short, hollow pasta that is typically curved into a small elbow-like shape, although it can also be straight. Made from durum wheat semolina, it has a firm texture that holds up well during cooking. Its tubular form makes it perfect for holding creamy, cheesy, or tomato-based sauces, allowing for a rich flavor in every bite.

- **Short, hollow, elbow-shaped pasta.**
- **Made from durum wheat semolina.**
- **Ideal for creamy, cheesy, or baked recipes.**
- **Popular in comfort foods like macaroni and cheese.**

# SABUDANA

Sabudana, also known as tapioca pearls or sago, is a starchy food ingredient made from the edible starch extracted from the roots of the cassava plant. It is commonly used in Indian cooking, especially during fasting (vrat) days because it provides quick energy and is easy to digest.

- **Appearance: Small, white, round pearls.**
- **Composition: Mainly carbohydrates (starch), very little protein, fiber, or fat.**
- **Taste: Mild and neutral, absorbs flavors of spices and seasonings.**
- **Digestibility: Light on the stomach and a quick source of energy.**

Packaging can be customised as per requirement

[www.unigroups.com](http://www.unigroups.com)

# SPEGHETTI

Spaghetti is a type of long, thin, cylindrical pasta that originated in Italy. It is one of the most popular and widely recognized pasta varieties in the world.

- **Appearance:** Thin, round strands resembling strings.
- **Cooking:** Usually boiled until al dente (firm to the bite).
- **Nutritional Value:** Provides carbohydrates for energy, along with some protein and dietary fiber.

# Coconut

(Oil/Powder/Coconut)

Coconut is the fruit of the coconut palm (*Cocos nucifera*), widely grown in tropical regions. It is often called the “tree of life” because nearly every part of the plant is useful.

- **Structure:** A coconut has a tough outer husk, a hard brown shell, edible white flesh (called kernel or copra when dried), and refreshing coconut water
- **Nutritional Value:** Rich in healthy fats, dietary fiber, vitamins (C, E, B-complex), and minerals like potassium, magnesium, and manganese.

Packaging can be customised as per requirement
